

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 5+ years of experience delivering scalable web solutions across diverse sectors. Focused on maximizing system efficiency, enhancing user experience, and driving automation. Recognized for bridging technical and business needs through clean and maintainable code and effective collaboration with cross-functional teams. Brings a disciplined, analytical approach to building high-impact software that supports organizational goals.

TECHNICAL SKILLS

Languages & Frameworks	React, Next.js, Python, Django, JavaScript, TypeScript, C#, PHP
Databases & ORM	PostgreSQL, MySQL, SQL Server, Oracle, MongoDB, Firestore, Prisma
Backend & API Development	Node.js, Express, RESTful APIs, Axios, JWT, OAuth, Insomnia, Postman
Version Control & DevOps	Git, GitHub, GitHub Actions, Docker, CI/CD Pipelines, Automated Workflows
Cloud & AI Technologies	Microsoft Azure, GCP, Azure AI Foundry, Generative AI, Cloudflare R2
Project Management & Tools	Agile, Scrum, SDLC, Kanban, Trello, Jira, GitHub Projects, ClickUp
Core Competencies	Team Collaboration, Adaptability Problem-Solving, Self-Discipline & Initiative

PROFESSIONAL EXPERIENCE

- Full-Stack Developer — 4ChangeHub | Ottawa, ON

May 2025 — Present

 - Replaced spreadsheet-based healthcare revenue tracking with a React/Node.js application, improving data accuracy by 40% and centralizing financial workflows
 - Automated claims approvals by engineering robust middleware and RESTful APIs, enabling the reliable, high-volume processing of 200+ claims per month
 - Modernized a legacy Docker stack into microservices, integrating automated CI/CD pipelines to cut deployment cycles from days to under 15 minutes
 - Engineered automated CI/CD pipelines via GitHub Actions to streamline deployments, enabling multiple weekly releases and significantly accelerating software delivery cycles
 - Developed resilient file upload functionality using Cloudflare R2 with real-time tracking, reducing transaction failure rates by 62% through proactive validation
- AI Data Quality Analyst — Outlier | Toronto, ON

Oct 2024 — Feb 2025

 - Developed scalable AI training pipelines, processing 120K+ training records and improving model performance through optimized workflows
 - Troubleshoot API integration and data input issues, reducing model output failures by 30+ fewer errors per month and improving reliability
 - Refined AI algorithms via iterative evaluation, boosting user sentiment scores by 25% due to higher-quality, context-aware machine responses
 - Automated Python-based QA checks for model outputs, reducing manual validation efforts by 20 hours/month
 - Implemented prompt engineering techniques optimizing model responses, reducing task completion time by 30%
- Full-Stack Developer — Freelancer/Independent

Jan 2022 — Oct 2024

 - Optimized the Next.js reservation workflow and UI design to streamline user interactions, successfully supporting 300+ monthly bookings with significantly faster confirmation
 - Developed interactive data dashboards within the Next.js booking platform, streamlining information access and reducing report processing time by 4 hours per week
 - Integrated interactive Leaflet mapping into the React application, enabling users to seamlessly manage 500+ location datasets and significantly enhancing platform usability
 - Developed a high-efficiency C# WPF application for multilingual audio-to-text transcription, enabling automated processing of 30+ minute files across 20+ languages
 - Architected a scalable, Dockerized Django and PostgreSQL application with three integrated core features, streamlining challenge management and progress tracking

Career Break / Pursued academic and immigration goals — Aracaju, Brazil**Mar 2020 — Nov 2021**

- Leveraged the pandemic-related visa delay to master college-level English through dedicated daily immersion and structured study, successfully achieving proficiency goals
- Demonstrated proactive self-development by completing an intensive technical upskilling curriculum during the visa delay, effectively sharpening my competitive edge for the Canadian market
- Synthesized technical and soft skill development into a disciplined learning roadmap, successfully meeting long-term professional objectives despite global instability

Career Break / Cultural and language exchange in Canada — Toronto, ON**Jan 2019 — Jan 2020**

- Strategically relocated to Canada to achieve professional bilingual fluency, successfully integrating into the local tech ecosystem through 300+ hours of immersive English training
- Accelerated linguistic integration by completing 300+ hours of intensive English study and immersive programs, successfully bridging the gap for professional entry into the Canadian market
- Executed a strategic interprovincial travel plan to gain firsthand insights into Canada's diverse professional landscape, successfully accelerating my cultural fluency and adaptability for local integration

Senior Software Developer — 3Tecnos | Aracaju, Brazil**Jan 2013 — Sep 2018**

- Refactored C# backend logic in the ERP supply chain module to streamline invoice entry, reducing registration time by 10% and significantly boosting operational throughput for stakeholders
- Architected robust C# validation routines to enforce data integrity, ensuring 100% compliance with municipal regulations while reducing manual data reconciliation efforts
- Automated inventory audits via C# scripts, reducing discrepancies by 94% and providing real-time data accuracy for enterprise stakeholders
- Analyzed complex supply chain datasets via custom SQL reports, uncovering procurement inefficiencies that guided strategy and delivered an 8% reduction in overall operating costs
- Refactored complex legacy SQL procedures to improve index utilization, which reduced inventory report execution time by 5% and provided faster data access for decision-makers

EDUCATION**Technology Sector Occupational Language Training Certificate, Seneca Polytechnic****Sep 2025****Post Graduate Certificate in Information Systems for WEB, Tiradentes University****May 2005****Diploma in Data Process Technology, Tiradentes University****Aug 2002****CERTIFICATIONS****IBM - Python for Data Science, AI & Development****Jul 2026****Microsoft Certified - Azure AI Fundamentals****Jun 2026****Meta - Meta Full Stack Developer: Front-End & Back-End (Django REST Framework & APIs)****Jun 2026****Meta - Advanced React, Programming in Python and with JavaScript****Jan 2026****Harvard University - CS50's Web Programming with Python and JavaScript****Jul 2025****University of Toronto - Programming Fundamentals & Software Quality Certification****Jul 2025****Cisco – JavaScript Essentials I & II – Core & Intermediate Programming Concepts****Mar 2025****Udemy - The Ultimate React Course 2025 React, Next.js, Redux****Apr 2025****Udemy - React & React Native Professional Development Suite****Apr 2021****Stafford House International - Standard English Course/IELTS Preparation****May 2019**
