

PROFESSIONAL SUMMARY

Full-Stack Developer with 8+ years of software development experience combining application engineering, data management, and emerging AI capabilities. Built healthcare expense and revenue platforms using React, TypeScript, Node.js, and SQL, while developing data-driven features and cloud-based solutions. Brings a unique blend of full-stack engineering, database expertise, analytics, and AI knowledge to build intelligent and scalable business applications.

TECHNICAL SKILLS

Languages & Frameworks	React, Next.js, Python, Django, JavaScript, TypeScript, C#, PHP
Databases & ORM	PostgreSQL, MySQL, SQL Server, Oracle, MongoDB, Firestore, Prisma
Backend & API Development	Node.js, Express, RESTful APIs, Axios, JWT, OAuth, Insomnia, Postman
Version Control & DevOps	Git, GitHub, GitHub Actions, Docker, CI/CD Pipelines, Automated Workflows
Cloud & AI Technologies	Microsoft Azure, GCP, Azure AI Foundry, Generative AI, Cloudflare R2
Project Management & Tools	Agile, Scrum, SDLC, Kanban, Trello, Jira, GitHub Projects, ClickUp
Core Competencies	Team Collaboration, Adaptability Problem-Solving, Self-Discipline & Initiative

PROFESSIONAL EXPERIENCE

Full-Stack Developer — 4ChangeHub | Ottawa, ON May 2025 — Present

- Architected and developed a full-stack solution to replace legacy healthcare financial workflows, improving data transparency and operational efficiency across the expense and revenue lifecycle
- Engineered robust middleware and RESTful APIs to automate claims approvals, enabling reliable, high-volume processing of 200+ claims monthly while significantly reducing manual processing time
- Modernized a legacy monolithic Docker application into a microservices architecture; integrated GitHub Actions CI/CD to reduce deployment cycles from days to under 15 minutes
- Deployed interactive dashboards with complex measures, providing real-time KPI tracking that enabled stakeholders to shift to data-driven strategies and improve operational decision-making.
- Built a custom file upload system using Cloudflare R2 with real-time tracking, reducing transaction failure rates by 62% through proactive server-side validation

AI Data Quality Analyst — Outlier | Toronto, ON Oct 2024 — Feb 2025

- Developed and optimized automated training pipelines, ensuring high-quality data ingestion and improving the speed and reliability of machine learning model training
- Diagnosed and resolved critical API integration failures, reducing monthly model output errors by 27% and improving overall system reliability for production environments
- Improved the quality of machine-generated interactions by refining core algorithms, leading to significantly higher user engagement and sentiment scores
- Engineered automated Python-based quality assurance workflows for model outputs, reducing manual validation efforts by 20 hours per month and increasing testing coverage
- Optimized machine responses through strategic prompt tuning, directly improving user productivity and the overall efficiency of AI task execution

Full-Stack Developer — Freelancer/Independent Jan 2022 — Oct 2024

- Engineered a more efficient reservation API data-fetching layer in Next.js using custom hooks, reducing database round-trip times and supporting 300+ seamless monthly bookings
- Developed interactive, data-driven dashboards to provide stakeholders with immediate visibility into key metrics, replacing time-intensive manual reporting
- Integrated interactive Leaflet maps into the React application, enabling efficient management and visualization of 500+ location datasets with high responsiveness
- Engineered a high-efficiency C# WPF application for multilingual transcription, automating the processing of 30-minute audio files across 20+ languages with 95% accuracy
- Designed and deployed a robust full-stack solution using Django and Docker, providing a scalable foundation for challenge management and progress tracking

Career Break / Pursued academic and immigration goals — Aracaju, Brazil**Mar 2020 — Nov 2021**

- Leveraged the pandemic-related visa delay to master college-level English through dedicated daily immersion and structured study, successfully achieving proficiency goals
- Demonstrated proactive self-development by completing an intensive technical upskilling curriculum during the visa delay, effectively sharpening my competitive edge for the Canadian market

Career Break / Cultural and language exchange in Canada — Toronto, ON**Jan 2019 — Jan 2020**

- Strategically relocated to Canada to achieve professional bilingual fluency, successfully integrating into the local tech ecosystem through 300+ hours of immersive English training
- Accelerated linguistic integration by completing 300+ hours of intensive English study and immersive programs, successfully bridging the gap for professional entry into the Canadian market

Senior Software Developer — 3Tecnos | Aracaju, Brazil**Jan 2013 — Sep 2018**

- Refactored critical C# logic in the ERP system to eliminate processing delays during invoice registration, ensuring a more stable and efficient supply chain workflow for the enterprise
- Strengthened system-wide data integrity by architecting custom validation routines, ensuring full adherence to municipal regulations and minimizing error risks
- Automated enterprise-wide inventory audits using custom C# scripts; achieved a 94% reduction in stock discrepancies and ensured near-real-time data accuracy
- Delivered actionable business intelligence by optimizing complex SQL reporting, uncovering hidden inefficiencies and guiding strategic procurement decisions.
- Optimized critical database queries and indexes in SQL Server, decreasing latency for high-frequency inventory reports by 5% and ensuring faster decision-making cycles

EDUCATION**Occupation-Specific Language Training (OSLT) Certificate — Technology Sector, Seneca Polytechnic****Sep 2025****Post Graduate Certificate in Information Systems for WEB, Tiradentes University****May 2005****Diploma in Data Process Technology, Tiradentes University****Aug 2002****CERTIFICATIONS****IBM - Data Analyst Professional****Jun 2026 - Sep 2026****Microsoft - Certified Azure AI Fundamentals (AI-900)****Jun 2026****Meta - Meta Full Stack Developer: Front-End & Back-End (Django REST Framework & APIs)****Oct 2025 - Jun 2026****University of Toronto - Crafting Quality Code****Jun - Jul 2025****Harvard University - CS50's Web Programming with Python and JavaScript****Apr - Jul 2025**
